DETAILED ACTION

1. Figures 2, 8-9, and 15-16 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's admitted prior art [see page 1 line 10 to page 12 line 15. Referred as the AAPA herein after].

Regarding claim 1, the AAPA teaches:

a middle-high-range luminance component compensation section for compensating for a middle-high-range luminance component of a low-frequency luminance signal generated based on the complementary color image data such that the low-frequency luminance characteristic which is lower than or equal to a predetermined frequency [see pages 11 lines 10-17 and figure 9. Note the combination of graphs d and c refers to "compensating a middle-high-range luminance component"].

Art Unit: 2621

4. Claims 2-16 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 2, the cited prior art fails to teach or suggest an image processing apparatus for processing complementary color image data output from an image capturing element including a complementary-color filter, comprising claimed features recited in last 11 lines.

Dependent claims 4-16 are also allowed for the same reasons as above.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Examples of color image forming systems are Nagasawa et al. [USPN 5,111,283], Kawamura et al. [USPN 4,931,864], and Sasaki et al. [USPN 4,959,659].

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duy M. Dang whose telephone number is 571-272-7389. The examiner can normally be reached on Monday to Friday from 5:30AM to 2:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bhavesh Mehta can be reached on 571-272-7453. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
